## PROJECTS

---

**"The NewYork Times's"** Developed a research-based project analysing *TheNewYorkTimes's* journalism, audience engagement, and media impact using HTML, Css.

**"Movie Database Application"** Built a Movie Database App with search, filtering and management features. Implemented a user-friendly UI and optimized data retrieval for better performance using JDBC, Servlet, HTML, SQL.

**"Resume Screening System"** I made a Resume Screening System as my project. Users can upload resumes in PDF or Word format, and the system reads the information like name, skills, experience, and education. It then checks if the candidate's details match the job requirements to help recruiters select the right people. I also used AI to suggest missing skills. This project helped me learn Java, databases, and some machine learning.
